

Do I need a licence for my hobby farm?

If you're diverting or using water for livestock watering, that's a non-domestic use and normally needs an authorization.

Following is what is considered domestic purpose:

Domestic Purpose – "domestic purpose" means the use of water for household purposes by the occupants of, subject to the regulations, one or more private dwellings, other than multi-family apartment buildings, including, without limitation, hotels and strata titled or cooperative buildings, located on a single parcel, including, without limitation, the following uses: (Section 2, WSA) (a) drinking water, food preparation and sanitation; (b) fire prevention; (c) providing water to animals or poultry kept (i) for household use, or (ii) as pets; (d) irrigation of a garden not exceeding 1000 m² that is adjoining and occupied with a dwelling, [note that a 'garden' includes a lawn] Sub purposes – Note that there is only one sub purpose for domestic, 'domestic' – please choose that for domestic water use.

If your purpose is not limited to domestic purpose as defined here, then you will need to apply for a license.
